## SKILLS

Remix(React's Framework)

Typescript

Tailwind CSS

Golang

PHP

## ABOUT ME

Greetings! I am Bunnarot, a recently graduated computer science student at the Royal University of Phnom Penh (RUPP). I have a deep passion for coding, as it give both creativity and challenges, despite the stress it may bring. In my free time, I engage in activities such as staying updated with the latest developments and news in Web Development, reading books, and conducting research on freely available online coding courses.

## EDUCATION

### Coding & Programming Degree
*Python*
### RUPP
2022

### BACHELOR DEGREE
*General*

### Hun Sen Chhuk High school
2020

## EXPERIENCE

Although I haven't had direct experience in web development, I have a strong foundation in core programming concepts such as C/C++, Golang, Python, and JavaScript. This background should allow me to learn web development at a faster. I leveraged online resources to self-teach programming and improved my skills by building projects. My experience includes:

- Academic Projects: Developed content management systems (CMS) using WordPress, Joomla, and full-stack web development with both vanilla PHP and Laravel framework.

- Personal Projects: Created a game-hub platform and a movie website, showcasing my ability to apply my skills outside of academic requirements.

All my projects on github or click here
